## Information Management

**Cognos**<sup>®</sup>  
software

For the first time ever, mid-market companies have the unique opportunity to reap the benefits of enterprise BI software packaged with a rapid development services solution from ISA Consulting.

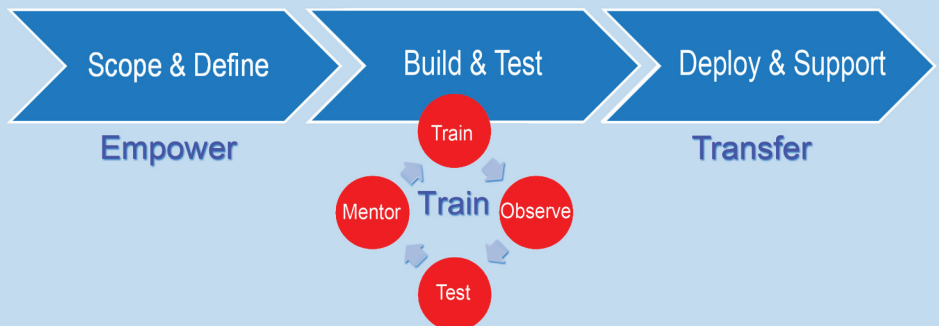

In 4 short weeks, clients can move from disparate systems and disconnected spreadsheets to an integrated BI and performance management platform from IBM Cognos.

Organizations, especially mid-market companies, need to demonstrate quick results from their software investments. **ISA's Express Solution** combines proven practices for BI development with a focus on knowledge transfer so our customers are well-trained and self-sufficient after the ISA team moves on.

**Cognos Express** is the first and only integrated, one-stop BI and planning solution, built exclusively for mid-market companies that want to think big, but start small.

- Straight-forward architecture enables minimal IT support
- Web and Excel interfaces promote user adoption
- Packaged to start small – start anywhere and grow
